The [22nd International Conference on Cognition and Exploratory Learning in Digital Age](#) (CELDA 2025), the [22nd International Conference Applied Computing](#) (AC 2025) and the [24th International Conference WWW/Internet](#) (ICWI 2025) will be held in Porto, Portugal, between 1 to 3 November 2025.

22nd International Conference on Cognition and Exploratory Learning in Digital Age

The [CELDA 2025](#) conference aims to address the main issues concerned with evolving learning processes and supporting pedagogies and applications in the digital age. There have been advances in both cognitive psychology and computing that have affected the educational arena. The convergence of these two disciplines is increasing at a fast pace and affecting academia and professional practice in many ways. Paradigms such as just-in-time learning, constructivism, student-centered learning and collaborative approaches have emerged and are being supported by technological advancements such as simulations, virtual reality and multi-agents systems. These developments have created both opportunities and areas of serious concerns. This conference aims to cover both technological as well as pedagogical issues related to these developments. Main tracks have been identified please check: <http://www.celda-conf.org/call-for-papers>

22nd International Conference Applied Computing

The Applied Computing 2025 conference ([AC 2025](#)) aims to address the main issues of concern within the applied computing area and related fields. This conference covers essentially technical aspects. The conference is divided into more detailed areas, for more information please check: <http://www.computing-conf.org/call-for-papers>

24th International Conference WWW/Internet

The WWW/Internet 2025 conference ([ICWI 2025](#)) aims to address the main issues of concern within WWW/Internet. WWW and Internet had a huge development in recent years. Aspects of concern are no longer just technical anymore but other aspects have aroused. This conference aims to cover both technological as well as non-technological issues related to these developments.

The conference accepts submissions in the following six main areas: Web 2.0; Semantic Web and XML; Applications and Uses; Services, Architectures and Web Development; Research Issues; Emergent Areas. For more details please check: <http://www.internet-conf.org/call-for-papers>
